EXECUTIVE OVERVIEW

Dubai's real estate market entered a new phase of scale and maturity in 2025, supported by sustained transaction activity, broader investor participation, expanding rental registrations and continued development momentum. The year reinforced the sector's role as a central pillar of Dubai's economic growth, urban development and global investment positioning.

Market scale and transaction depth

Dubai recorded 270,328 real estate transactions in 2025, up 20% from 2024, while total transaction value increased 20% to AED 917 billion. Sales remained the largest category, with 217,889 transactions valued at AED 680 billion, followed by mortgage registrations at AED 180 billion and gift transactions at AED 57 billion.

Investor participation and market continuity

Unique investors rose to 193,100 from 156,149 in 2024, while total investment value reached AED 680 billion across 258,554 investments. New investors accounted for AED 348 billion, while repeat investors contributed AED 332 billion, indicating a market that continues to attract new capital while retaining existing participants.

Global investor reach

Dubai's investor base remained geographically broad. Asia and Europe together contributed nearly AED 496 billion in investment value, while South Asia remained the largest source region, with 52,348 investors and AED 123.3 billion. Female participation also strengthened, with 63,577 female investors and AED 154 billion in investment value, up 31% year-on-year.

Off-plan, existing and land activity

Off-plan activity accounted for 63.3% of total investment activity in 2025, compared with 61.0% in 2024, reinforcing the role of new development in market growth. Existing properties and vacant land also recorded significant transaction values of AED 312.2 billion and AED 309.7 billion, respectively.

Price performance and rental market expansion

Price indicators continued to rise across major categories. Average residential unit prices reached AED 20,666 per sq.m, residential villa prices reached AED 16,791 per sq.m, commercial units reached AED 22,119 per sq.m and commercial villas reached AED 20,480 per sq.m. Rental contracts exceeded one million for the first time, with total annual rent value reaching AED 98.9 billion.

Market outlook

Overall, Dubai's 2025 real estate performance points to a market supported by scale, liquidity, diversified investor participation and continued development momentum. The sector remains aligned with Dubai's wider economic vision, underpinned by regulation, digital infrastructure, long-term residency reforms and investment in urban infrastructure. As Dubai strengthens its position as a global hub for investment, innovation and sustainable living, real estate remains central to the emirate's long-term growth strategy and to DLD's commitment to transparency, investor confidence and a world-class market ecosystem.

02

MACROECONOMIC OVERVIEW

Dubai GDP Grew 4.7% in 2025 as UAE GDP Growth Reached 5.6%

UAE GDP growth moderated from 4.3% in 2023 to 4.0% in 2024, reaching 5.6% in 2025. Dubai's economy expanded by 4.7% in 2025. Dubai recorded GDP of approximately AED 355 billion in the first nine months of 2025, including AED 113.8 billion in Q3.

Economic activity strengthened in 2025, with 5.3% growth recorded in Q3 compared with the same period in 2024. The real estate sector expanded by 6.7%, generating AED 29 billion and accounting for 8.2% of Dubai's GDP.

UAE & Dubai GDP Growth Rates (2021–2025)

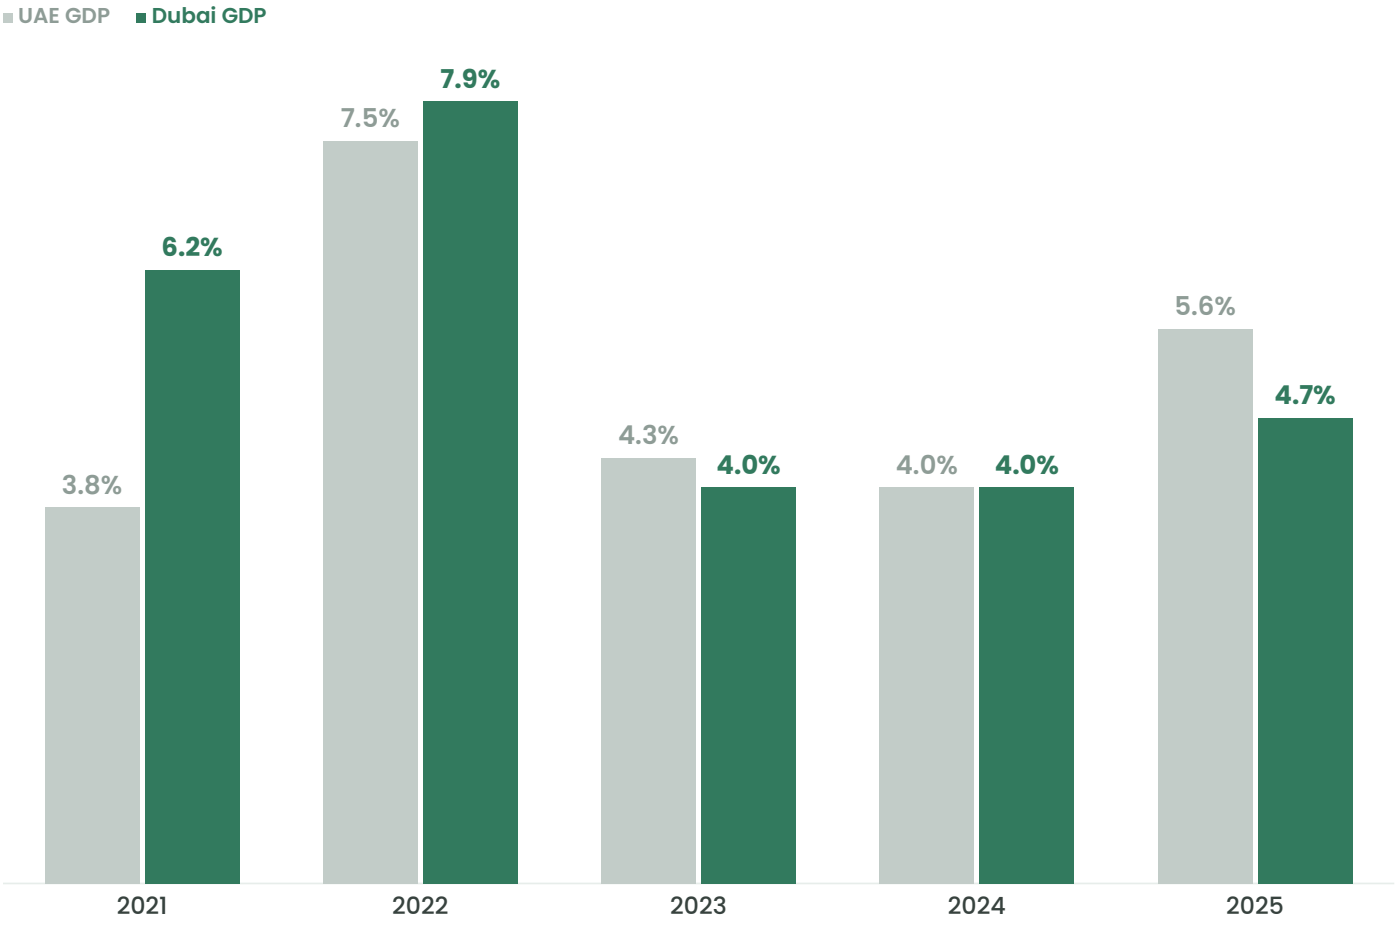

Fig 2.1: UAE and Dubai GDP Growth Rates (%), 2021–2025 · *Source: Ministry of Economy, Central Bank, DED*

Dubai CPI Reached 116.8 in 2025, Exceeding the UAE Index of 111.1

UAE consumer prices increased from 101.1 in 2021 to 111.1 in 2025. Dubai's CPI rose from 103.2 to 116.8 over the same period. Price growth accelerated in Dubai after 2022.

Dubai's CPI increased from 106.7 in 2022 to 116.8 in 2025, exceeding the UAE index. The divergence reflects stronger price pressures in Dubai relative to the national average. Higher inflation affects household costs and pricing across residential and consumer markets.

Consumer Price Index (CPI): UAE vs Dubai (2021–2025)

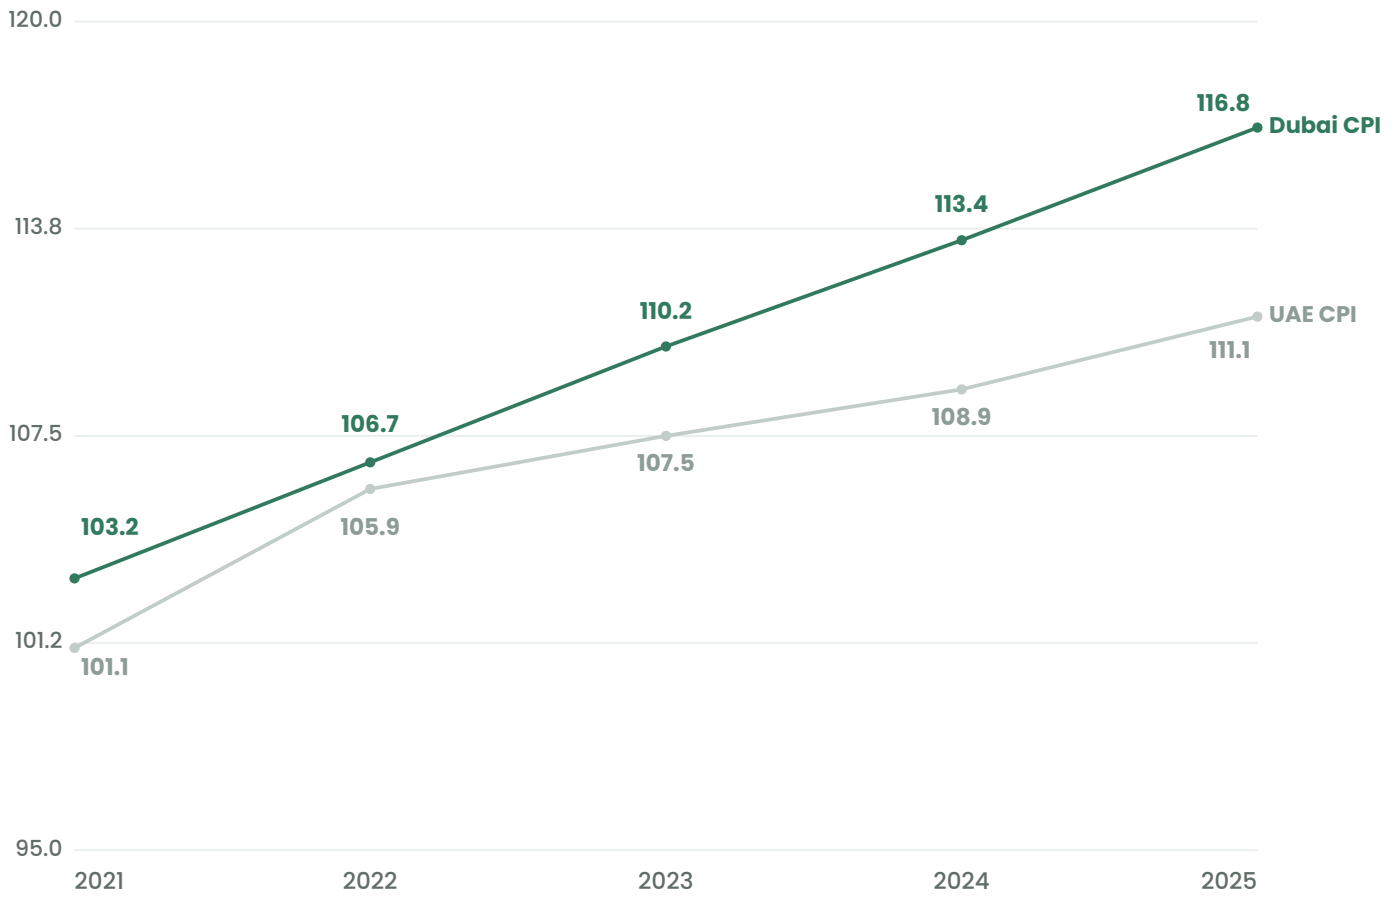

Fig 2.2: UAE and Dubai Consumer Price Index (CPI), 2021–2025 · *Source: Federal Competitiveness and Statistics Centre (FCSC) | Digital Dubai*

Dubai's Resident Population Reached 4.6 Million in 2025

Dubai's resident population increased from 1.9 million in 2010 to 4.6 million in 2025. The population crossed 3.0 million in 2017 and continued to expand each year. Growth accelerated between 2015 and 2019, then moderated slightly during 2020–2021 before recovering. Net additions remained positive across all years, indicating sustained inflows.

Transactions Rose 19% in 2025; Value Reached AED 917 Bn

Dubai recorded 270K transactions in 2025, increasing from 225K in 2024. Transaction value reached AED 917 Bn in 2025, rising from AED 761 Bn in the previous year. Activity increased across both transaction volume and value.

Transactions rose from 83K in 2021 to 270K in 2025. Transaction value increased from AED 306 Bn in 2021 to AED 917 Bn in 2025. In 2025, the total value of real estate transactions reached an all-time high of AED 917 billion, reflecting a 20% year-on-year increase. This highlights Dubai's continued appeal to both regional and international investors.

Transaction Volume and Value Growth (2021–2025)

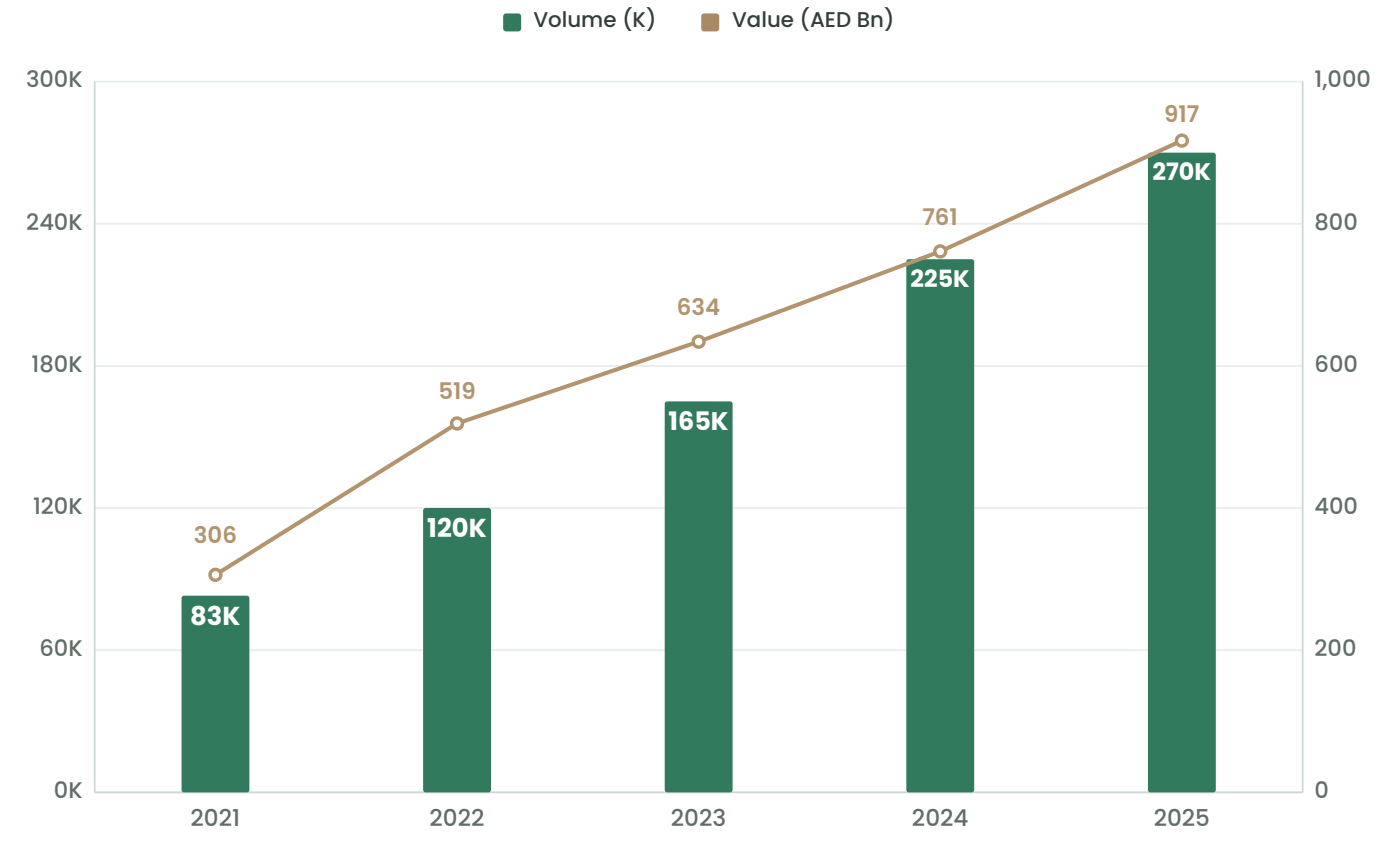

Fig 3.1: Transaction Volume and Value Growth (2021–2025)

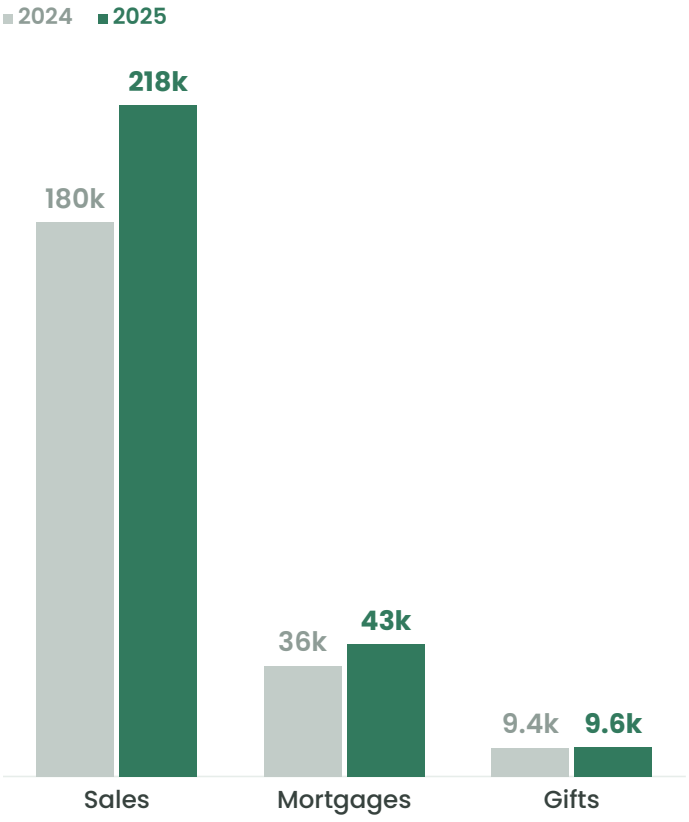

Sales Registrations Reached 218K; Mortgages and Gifts Added 53K

Sales transactions remained the dominant transaction type in 2025, accounting for 218K transactions compared to 43K mortgage transactions and 10K gift transactions. Sales activity increased 21% year-on-year, while mortgage and gift transactions increased 19% and 2%, respectively.

Sales transactions generated AED 680 Bn in value during 2025, followed by mortgage transactions at AED 180 Bn and gift transactions at AED 57 Bn. Sales transaction value increased 31% year-on-year, while gift transaction value increased 12%. Growth in sales, mortgage and gift transactions highlights continued market activity across both property ownership and future asset planning segments.

Transaction Volume by Group

Transaction Value by Group (AED Bn)

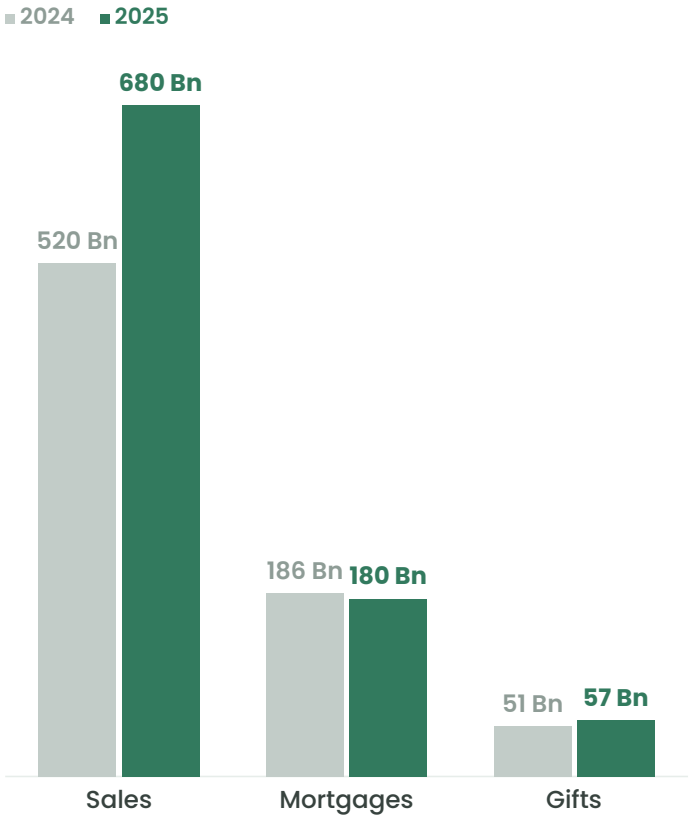

Fig 3.2: Transaction Volume and Value by Transaction Type, 2024 vs 2025

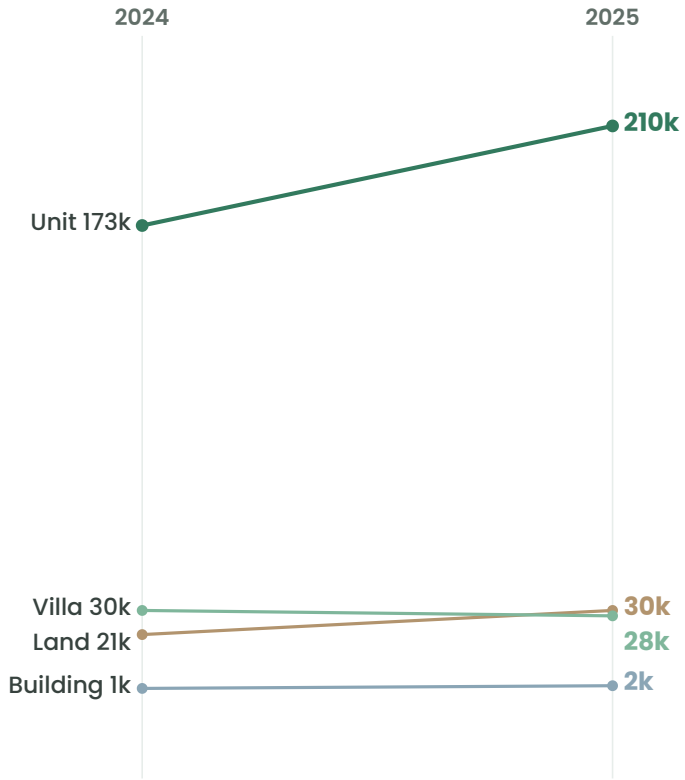

Unit Transactions Led Market Activity; Land Recorded the Fastest Growth

Unit transactions reached 210K in 2025, compared to 30K land transactions, 28K villa transactions and 2K building transactions. Unit activity increased 20% year-on-year, while land transactions recorded the strongest growth, increasing 43%.

Transaction value reached AED 396 Bn for units during 2025, followed by land at AED 320 Bn, villas at AED 137 Bn and buildings at AED 74 Bn. Transaction value increased across units, land and villas, with land recording the highest annual growth rate at 32%. Transaction activity remained broad based across development, investment and end-user segments.

Transaction Volume by Property Type

Transaction Value by Property Type (AED Bn)

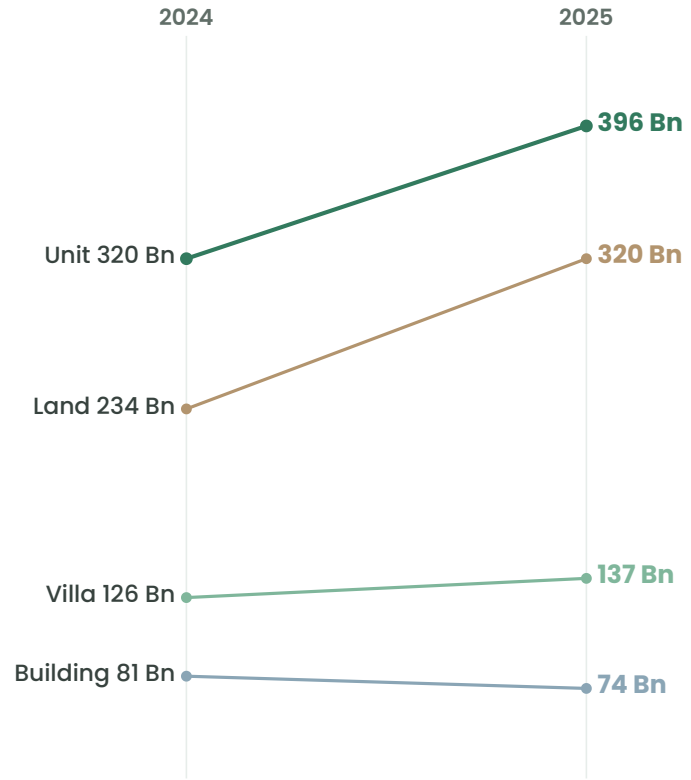

Fig 3.3: Transaction Volume and Value by Property Type, 2024 vs 2025

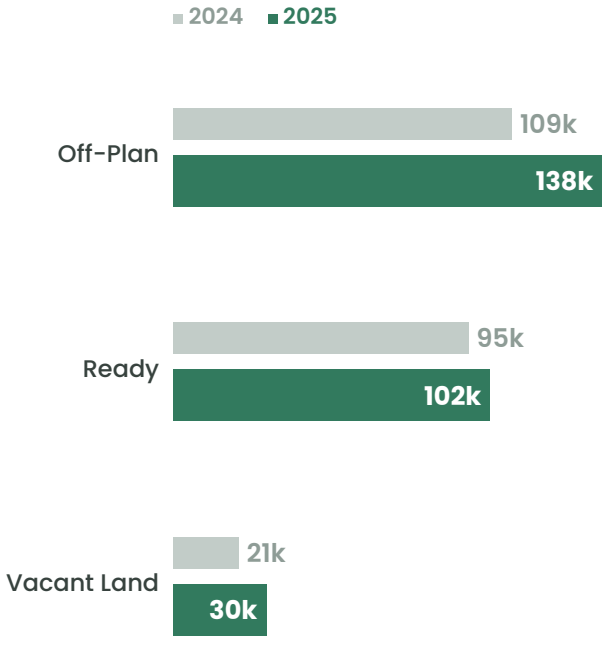

Off-Plan Transaction Volume at 138K; Ready and Vacant Land Generated AED 622 Bn in Value

Off-plan transactions remained the largest segment by transaction volume in 2025, accounting for 138K sales compared to 102K ready transactions and 30K vacant land transactions. Off-plan activity increased 24% year-on-year, while ready and vacant land transactions increased 7% and 43%, respectively.

Ready properties generated AED 312 Bn in transaction value, followed by vacant land at AED 310 Bn and off-plan properties at AED 295 Bn. Transaction value increased across all three property categories between 2024 and 2025, with vacant land recording the highest annual growth rate at 32%. Strong vacant land activity reflects continued investment in future development opportunities across Dubai.

04

PRICING & YIELD

Average Unit Prices Reached AED 20,666 per sq.m; Average Villa Prices Increased 15% in 2025

Average villa prices reached AED 16,791 per sq.m in 2025, increasing 15% from 2024. Average unit prices rose 6% to AED 20,666 per sq.m.

Between 2021 and 2025, average villa prices increased from AED 9,277 to AED 16,791 per sq.m, while average unit prices rose from AED 14,707 to AED 20,666 per sq.m. The average price gap narrowed from AED 5,430 per sq.m in 2021 to AED 3,875 per sq.m in 2025, as villa prices recorded stronger growth over the period.

Dubai Citywide Average Sales Price Trends (AED / sq.m)

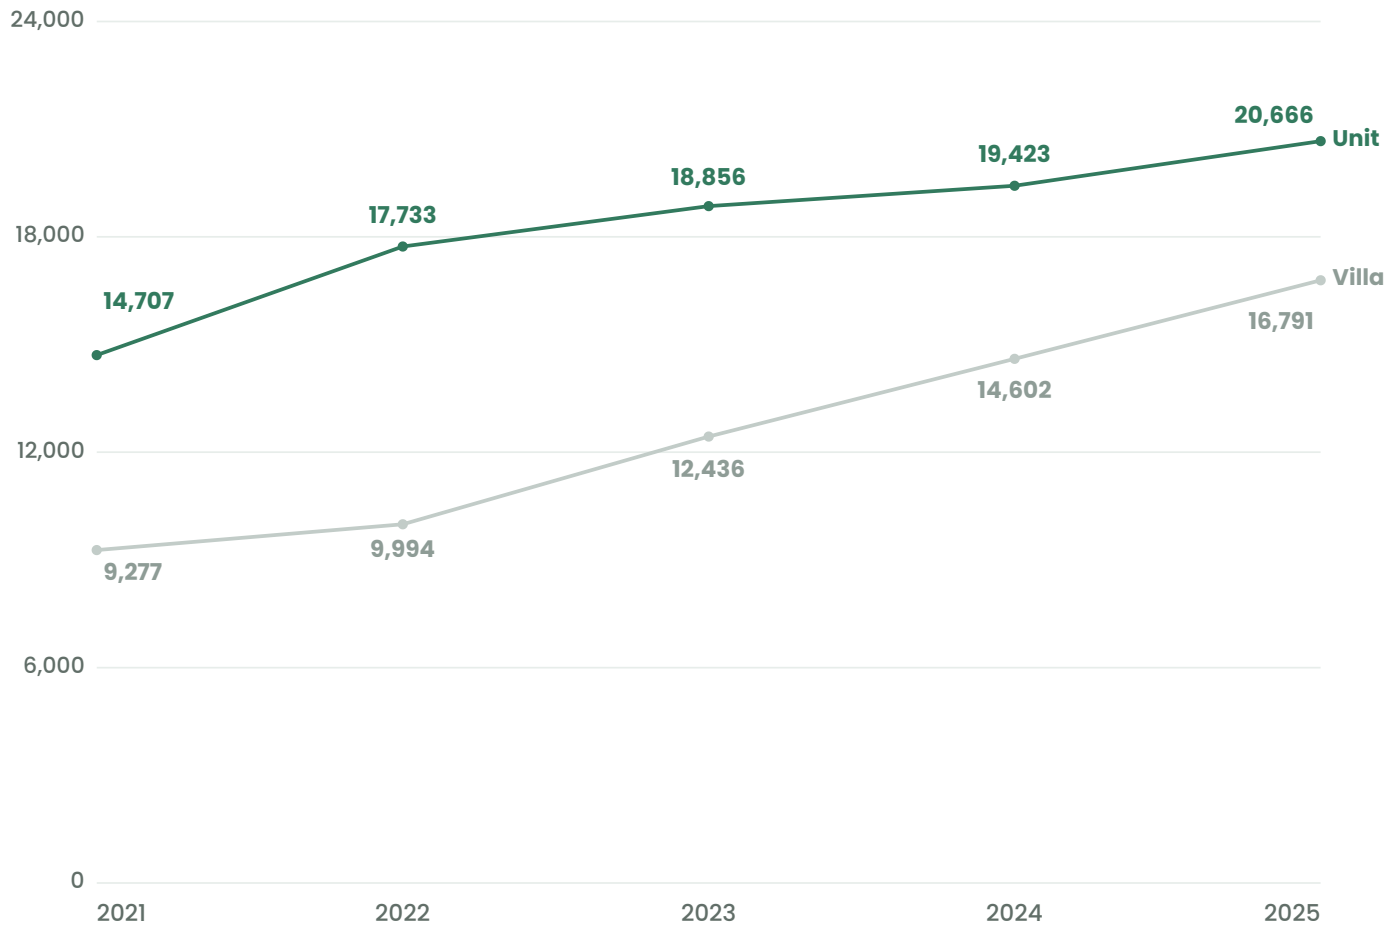

Fig 4.1: Average Sales Prices, Units vs Villas (2021–2025)

Commercial Unit Prices Reached AED 22,119/sq.m; Commercial Villas Reached AED 20,480/sq.m

Commercial asset values strengthened further in 2025, with average unit and villa sales prices reaching AED 22,119 and AED 20,480 per sq.m, respectively. Annual price growth remained robust at 20% for units and 19% for villas.

Over the 2021–2025 period, average commercial sales prices increased by 145% for units and 99% for villas. Commercial unit prices exceeded AED 22,000 per sq.m in 2025, reflecting continued value appreciation across Dubai's commercial market.

Dubai Citywide Average Commercial Sales Price Trends (AED / sq.m)

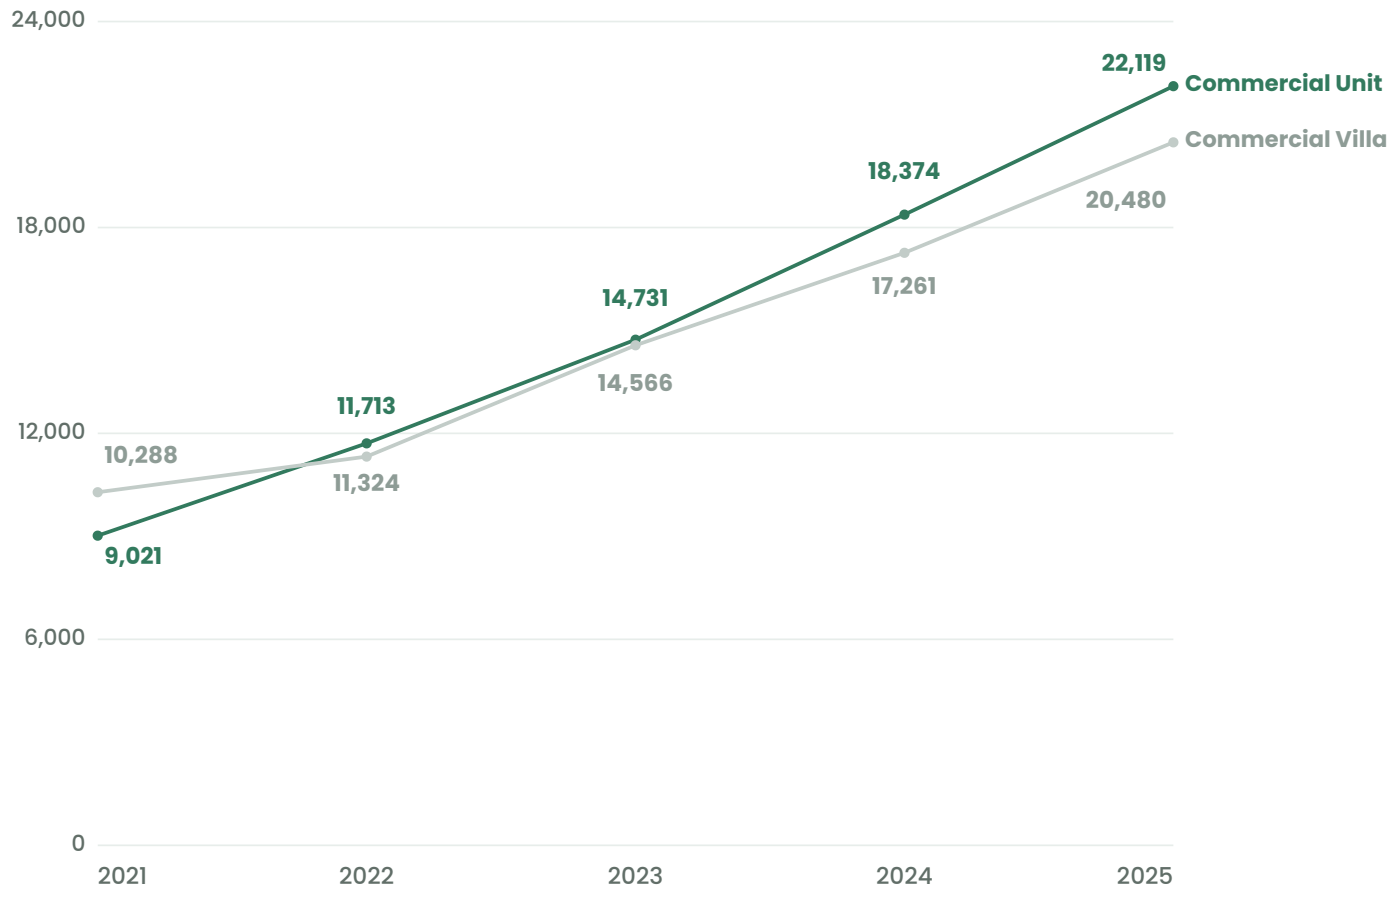

Fig 4.2: Average Commercial Sales Prices, Units vs Villas (2021–2025)

Freehold Unit Rents Rose in 2025: Commercial AED 1,977 and Residential AED 1,141 per sq.m p.a.

Commercial freehold unit rents increased by 13.2% year-on-year to AED 1,977 per sq.m per annum in 2025, while residential freehold unit rents rose by 13.5% to AED 1,141 per sq.m per annum.

Since 2021, commercial freehold unit rents have increased by 34.7%, from AED 1,468 to AED 1,977 per sq.m per annum. Residential freehold unit rents recorded stronger growth of 63.5%, rising from AED 698 to AED 1,141 per sq.m per annum, while commercial freehold units maintained the higher average rental rate throughout the period.

Dubai Citywide Average Unit Rental Rate Trends (AED / sq.m p.a.)

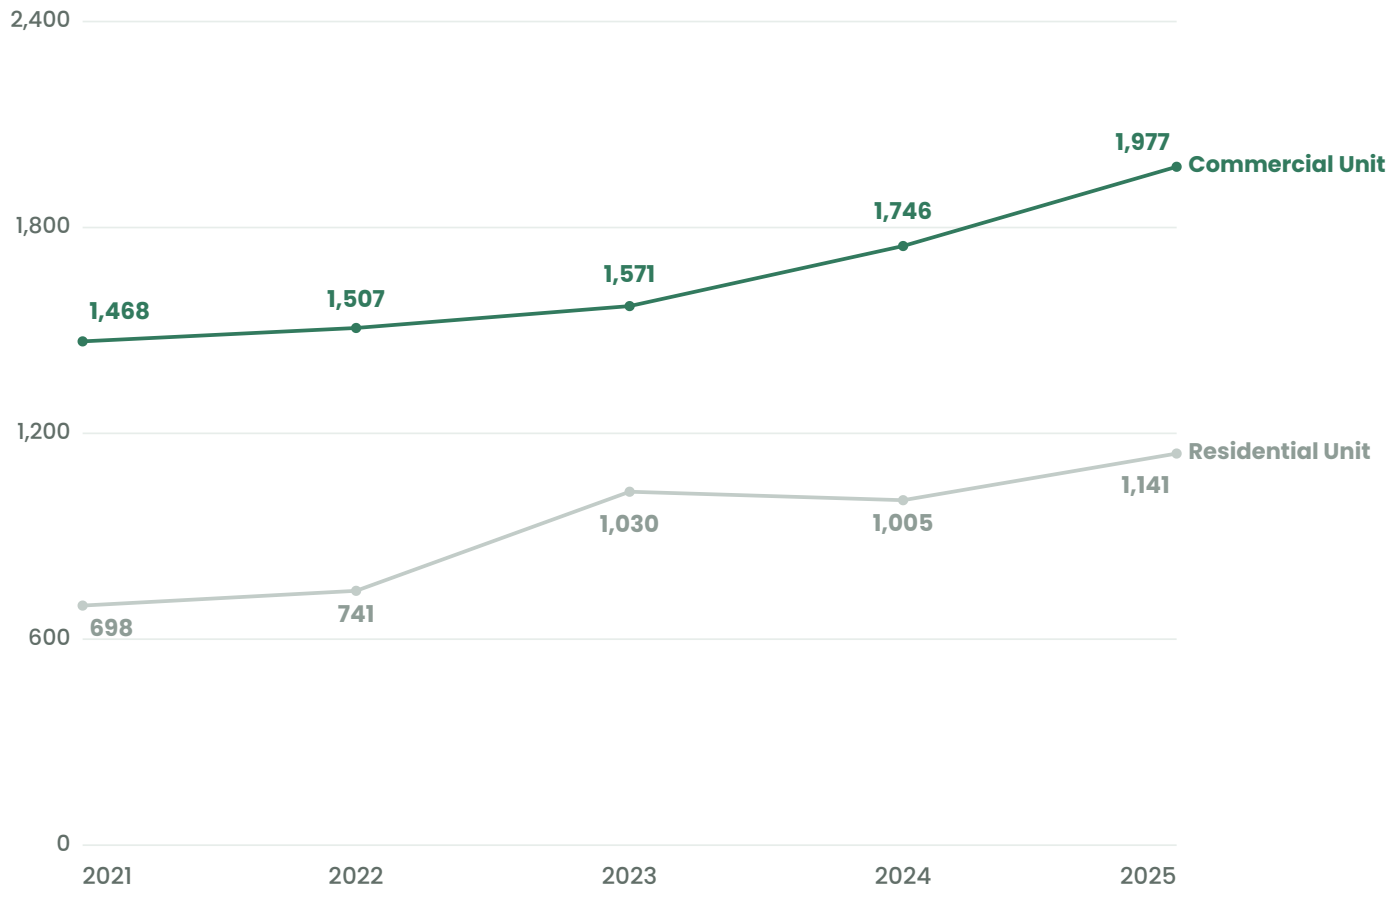

Fig 4.3: Average Residential and Commercial Unit Rents (2021–2025)

Freehold Villa Rental Rates Rose in 2025: Commercial AED 1,039 and Residential AED 791 per sq.m p.a.

Commercial freehold villa rents increased by 26.1% year-on-year, from AED 824 per sq.m per annum in 2024 to AED 1,039 in 2025. Residential freehold villa rents rose by 9.0%, from AED 726 to AED 791 per sq.m per annum. Commercial freehold villas maintained the higher average rental rate, while the rental gap narrowed from AED 361 per sq.m per annum in 2021 to AED 248 in 2025.

Residential freehold villa rents increased from AED 428 per sq.m per annum in 2021 to AED 791 in 2025, recording stronger percentage growth than commercial freehold villa rents, which rose from AED 789 to AED 1,039 per sq.m per annum over the same period.

Dubai Citywide Average Villa Rental Rate Trends (AED / sq.m p.a.)

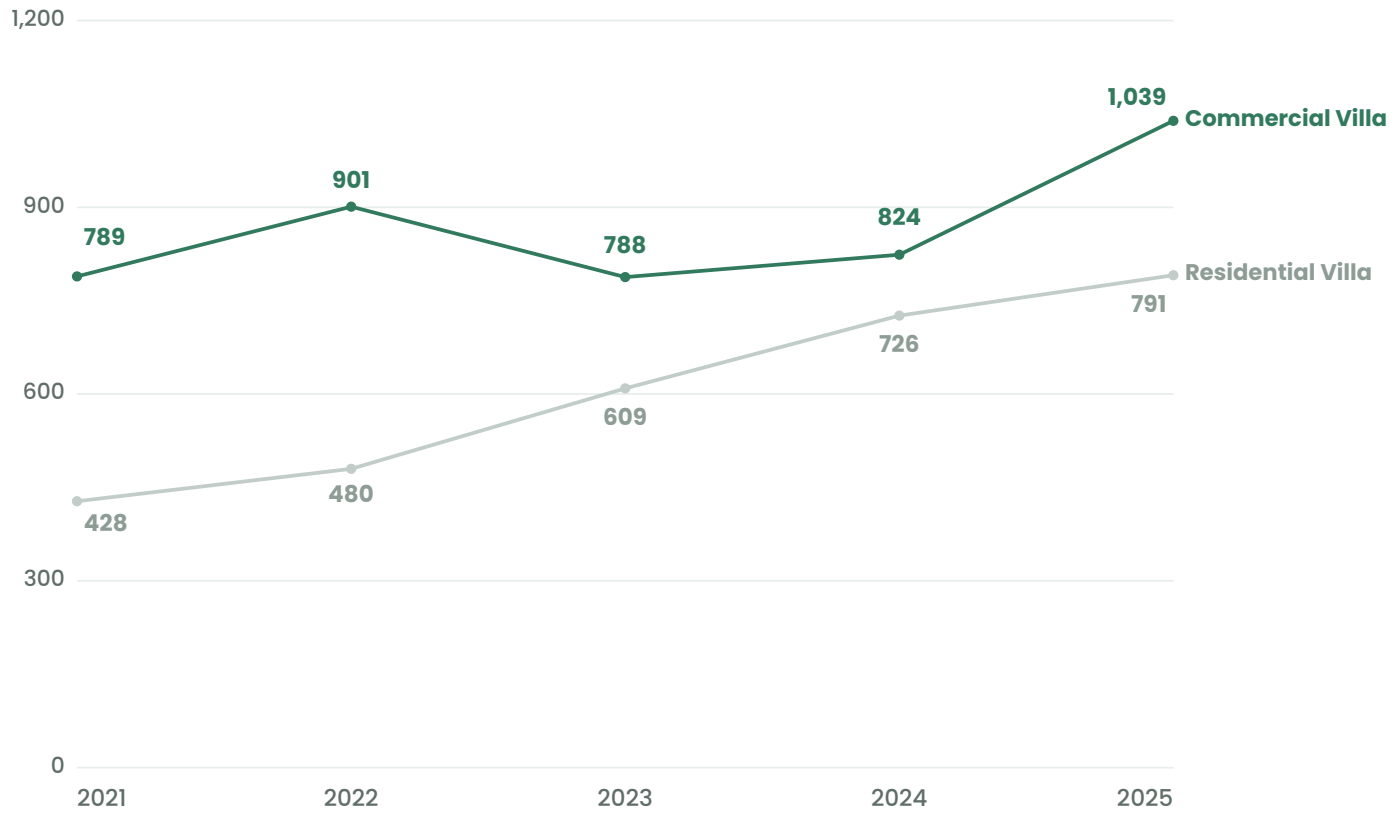

Fig 4.4: Average Residential and Commercial Villa Rents (2021–2025)

Commercial Freehold Unit Rents Averaged AED 1,977 per sq.m p.a.; Residential Freehold Unit Rents Averaged AED 1,141

Average commercial freehold unit rental prices reached AED 1,977 per sq.m per annum in 2025, compared with AED 1,141 per sq.m per annum for residential freehold units. Average residential and commercial freehold villa rental prices stood at AED 791 and AED 1,039 per sq.m per annum, respectively, with rental values increasing across all property types during the year.

Average rental values trended upward between 2021 and 2025, with commercial freehold units recording the highest rental levels, increasing from AED 1,468 to AED 1,977 per sq.m per annum. Average residential freehold unit rents rose from AED 698 to AED 1,141 per sq.m per annum, while residential and commercial freehold villa rental prices also moved higher, reflecting growth in leasing values across Dubai's residential and commercial property markets.

Asia Contributed AED 308 Bn in Investment; Europe Reached AED 188 Bn in 2025

Foreign real estate investment into Dubai increased across all major regions in 2025. Asia remained the largest source of capital, contributing AED 308 billion, up 39.3% year-on-year, while investment from Europe rose 38.2% to AED 188 billion. North America and Africa recorded AED 54.63 billion and AED 41 billion, respectively, with all regions posting annual growth.

The distribution of investment remained concentrated in Asia and Europe, which together accounted for nearly AED 496 billion in transaction value. Growth across every continent highlights the breadth of international demand for Dubai real estate, with the market continuing to attract capital from a diverse global investor base.

INVESTMENT VALUE AND GROWTH BY CONTINENT

CONTINENT	2025 VALUE (AED BN)	2024 VALUE (AED BN)	YOY GROWTH
Asia	308	221	+39.3%

Foreign Real Estate Investment by Continent

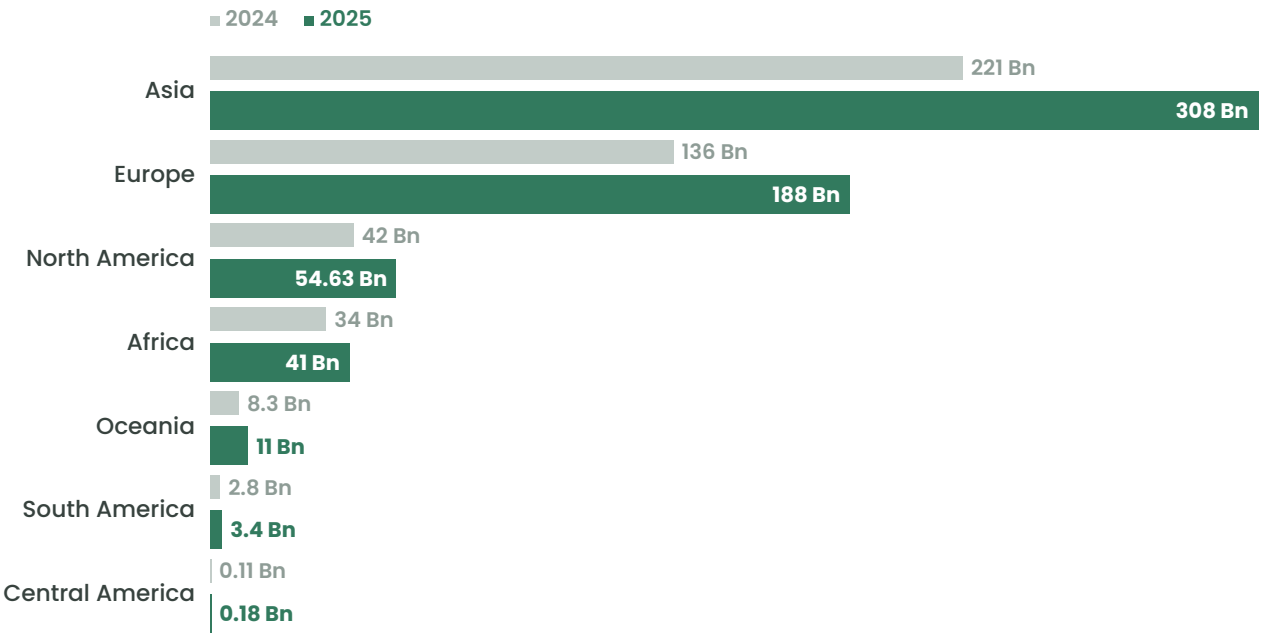

Fig 5.1: Foreign Real Estate Investment by Continent, 2024 vs 2025

South Asia Accounted for 52K Investors; Middle East Region Reached 30K Investors

South Asia remained the largest source of real estate investors in Dubai, with participation increasing to 52,000 investors in 2025 from 41,000 in 2024. The Middle East followed with 30,000 investors, while Western and Northern Europe recorded 17,000 and 16,000 investors, respectively. Investor participation increased across all top ten regions during the year.

The investor base remained geographically diverse, with participation led by South Asia, the Middle East and European markets. South Asia recorded the strongest increase among the leading investor regions, with participation rising 26.8% year-on-year, while investor activity across both Western and Northern Europe continued to expand, reflecting broad international engagement in Dubai's real estate market.

Top 10 Investor Regions by Number of Investors

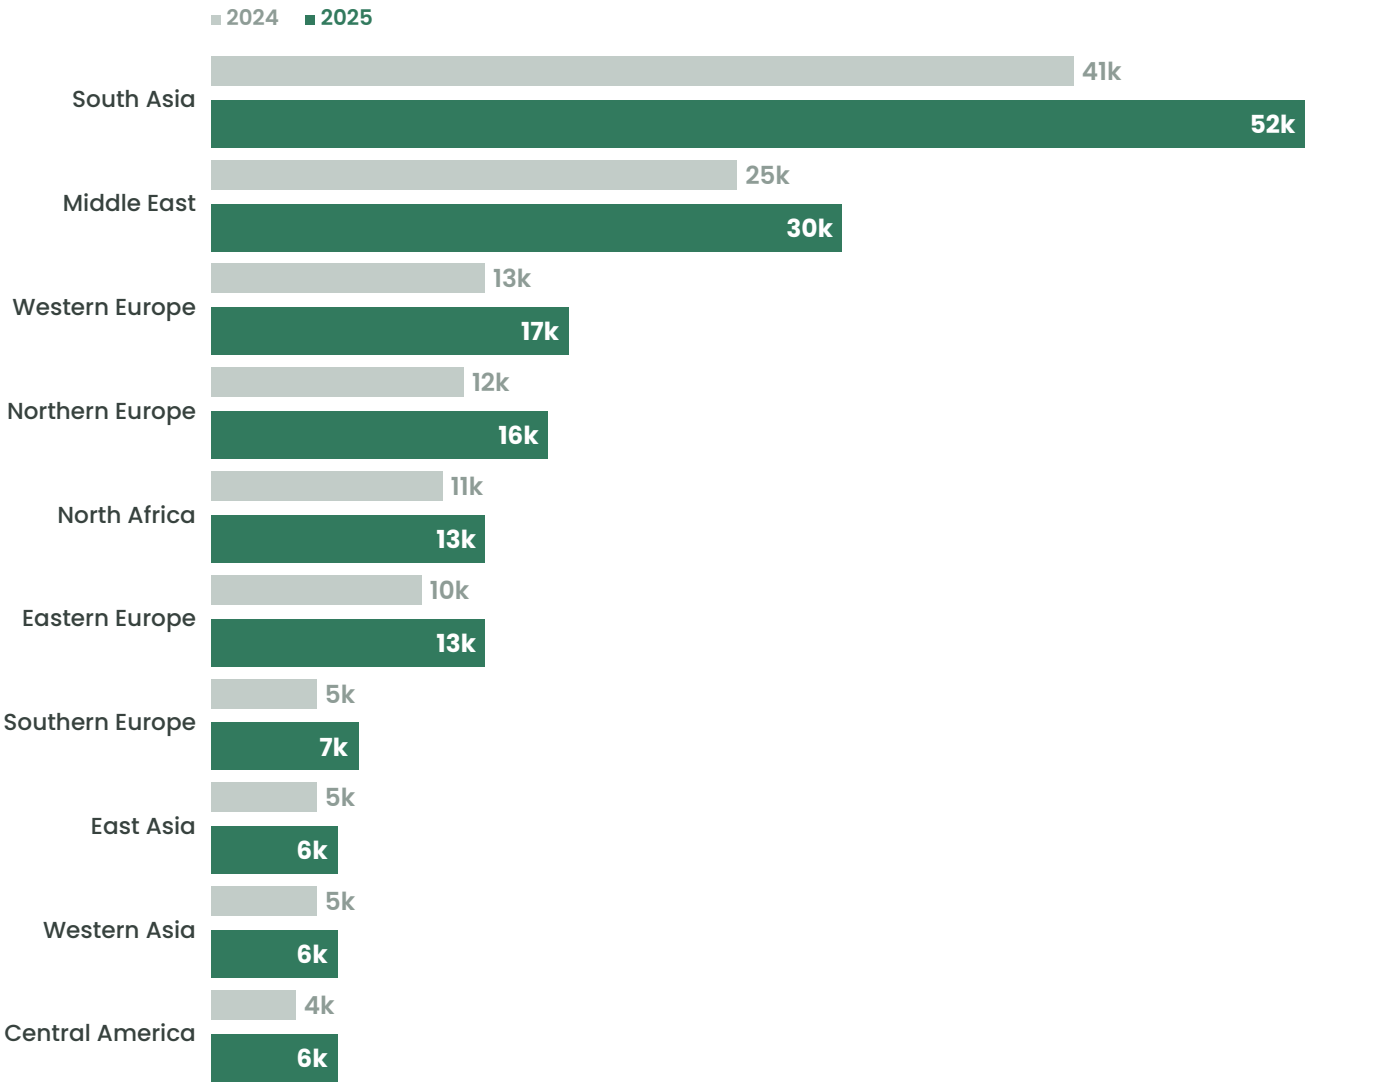

Fig 5.2: Top 10 Investor Source Regions by Investor Count, 2024 vs 2025

South Asia, Middle East and Northern Europe Led Investment Values in 2025

South Asia remained the leading source region with AED 123 billion in investment value, followed by the Middle East at AED 96 billion and Northern Europe at AED 56 billion. Combined, these three regions generated AED 275 billion, reinforcing the geographic breadth of Dubai's real estate investor base.

Among the leading investor regions, Northern Europe recorded the strongest growth in investment value, rising 33.1% year-on-year, narrowly ahead of Southern and Western Europe.

Top 10 Investor Source Regions by Investment Value (AED Bn)

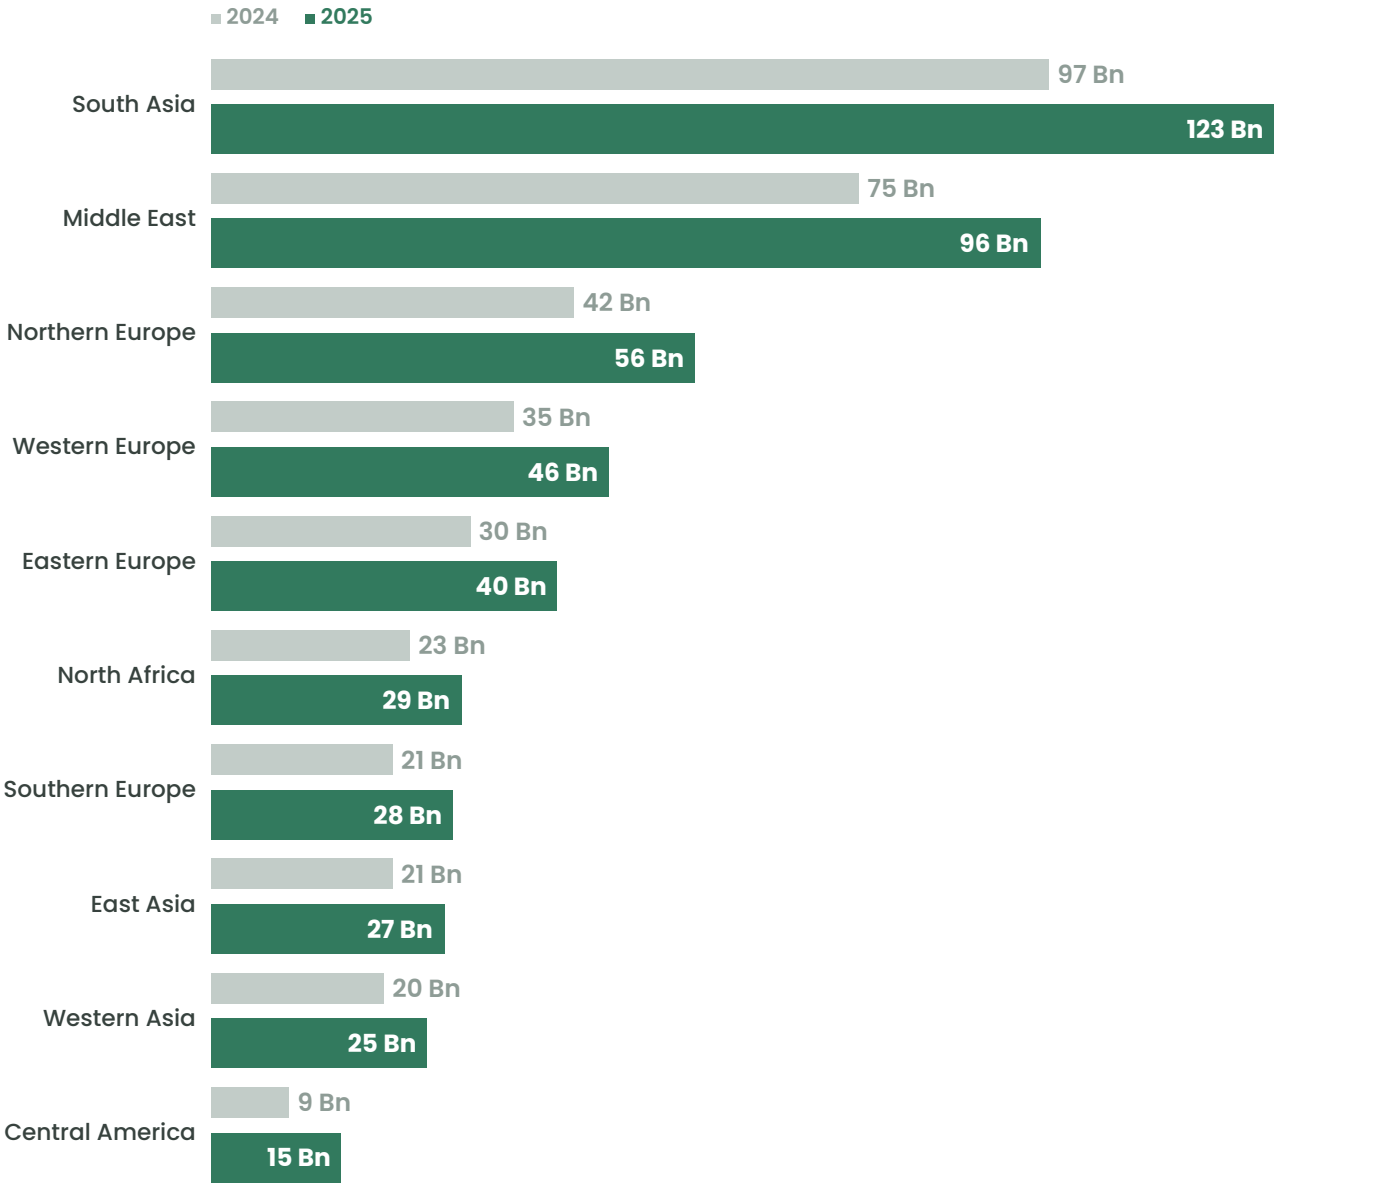

Fig 5.3: Top 10 Investor Source Regions by Investment Value, 2024 vs 2025

South Asia Led Investment Activity, While Europe Reached 69K Investments

Investment activity remained led by South Asian and Middle Eastern investors in 2025. South Asia accounted for 67,000 investments, increasing from 54,000 in 2024, while the Middle East recorded 40,000 investments, up from 35,000 a year earlier. Western and Northern Europe contributed a combined 42,000 investments, highlighting the continued presence of European investors in Dubai's real estate market.

The distribution of investment activity remained concentrated among South Asian, Middle Eastern and European investors. South Asia recorded a 24.1% year-on-year increase in the number of investments, while activity from the Middle East rose 14.3%. Western Europe also reported strong growth of 22.2%, highlighting continued engagement from both regional and international investor markets.

Top 10 Investor Regions by Number of Investments

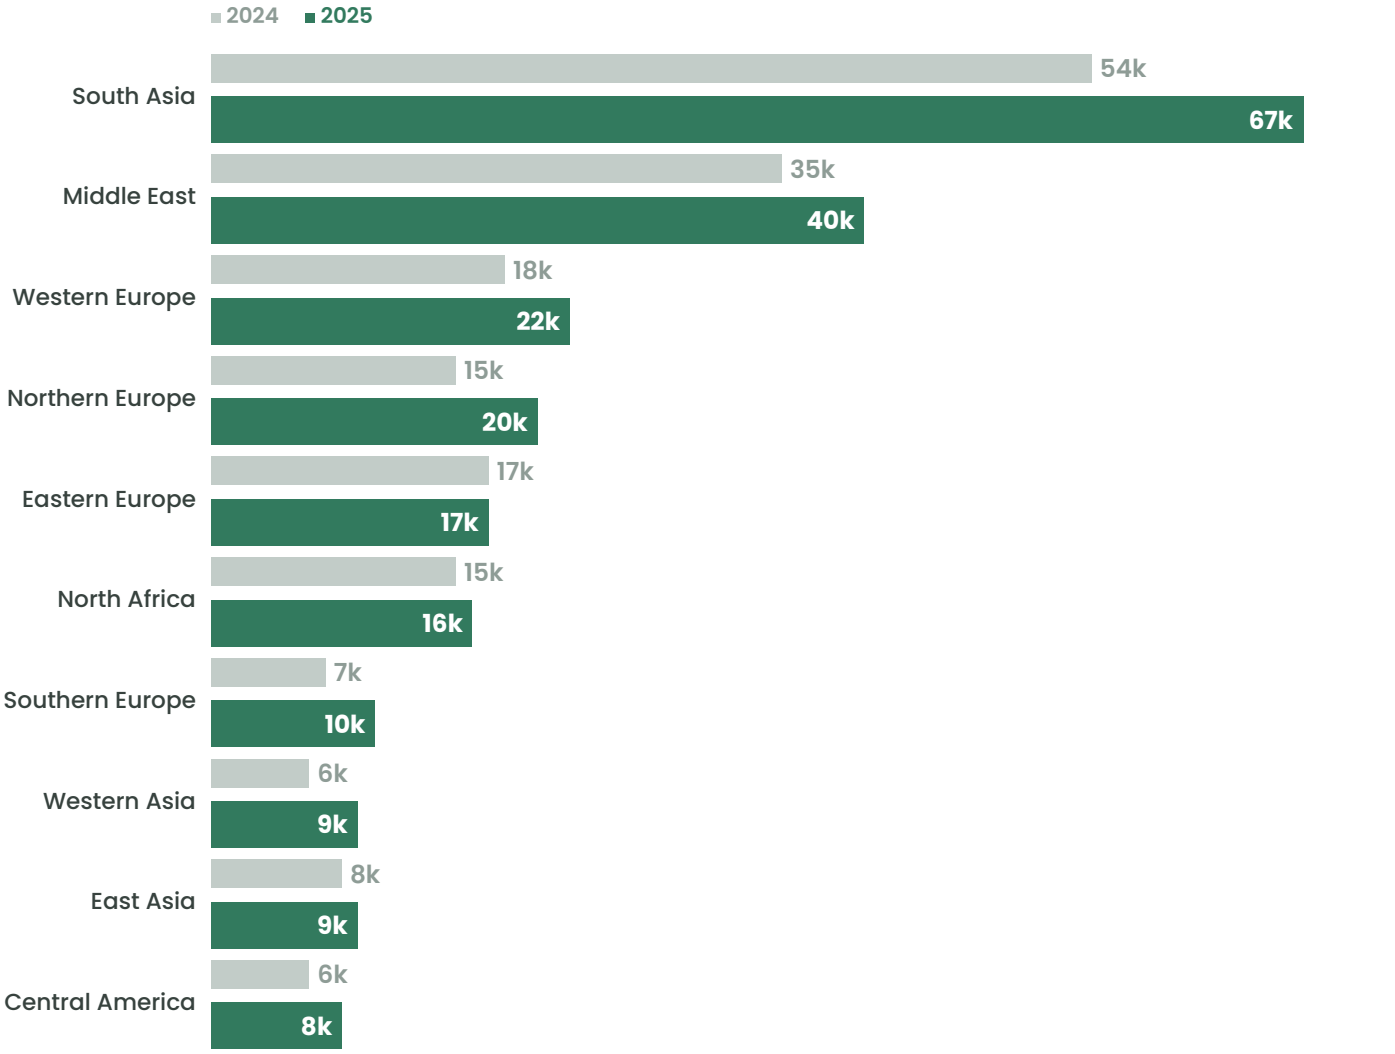

Fig 5.4: Top 10 Investor Source Regions by Number of Investments, 2024 vs 2025

Non-Resident Investors Favoured Off-Plan; Resident Activity Remained Balanced

Non-resident investors displayed a strong preference for off-plan properties in 2025, with 83.7% of investments directed toward the off-plan market and 16.3% allocated to existing stock. Resident investors showed a more balanced distribution, with 51.2% of investments in off-plan projects and 48.8% in existing properties. Non-residents accounted for 92,889 investments during the year, while resident investors recorded 156,997 investments.

Off-plan investments represented 63.3% of total investment activity in 2025. Non-resident investors allocated more than four-fifths of their investments to off-plan projects, while resident participation remained evenly distributed between off-plan and existing properties, highlighting differing investment patterns across the two investor groups.

OFF-PLAN AND EXISTING INVESTMENTS BY INVESTOR TYPE

INVESTOR TYPE	OFF-PLAN	EXISTING	TOTAL	% OFF-PLAN

Fig 5.7: Investment Activity by Property Type and Investor Type, Split by Residency, 2025

Female Investor Participation Increased 23%; Total Investment Base Reached 250K

Male investors generated 173,672 investments in Dubai's real estate market in 2025, increasing from 144,873 in 2024. Female investors contributed 76,392 investments, up from 61,901 a year earlier. Investment activity increased across both gender groups, with male investors continuing to represent the larger share.

Total investment activity expanded by more than 43,000 during the year, reaching 250,064 investments in 2025 across a base of 193,100 unique investors. Female investment activity increased 23.4% year-on-year, slightly ahead of the 19.8% growth recorded among male investors, indicating continued broadening of participation across the market.

Investment Activity by Gender

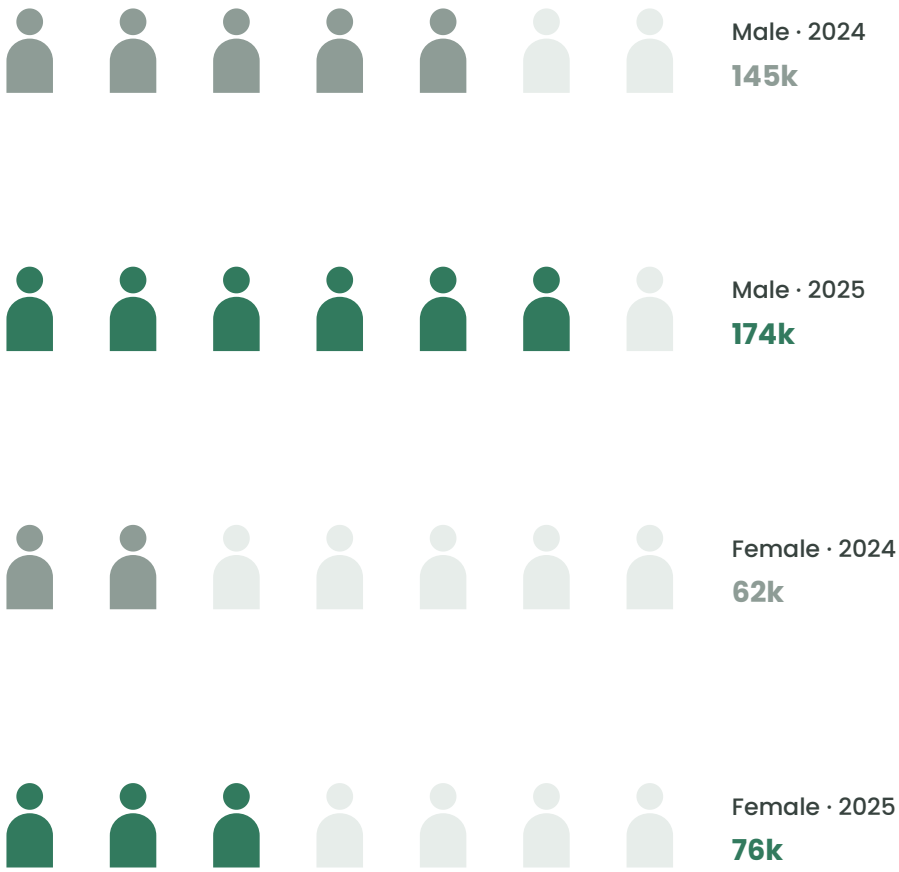

Fig 5.8: Investor Participation by Gender (2024 vs 2025)

Investment Value Reached AED 606 Bn; Male Investors Contributed AED 453 Bn

Male investors generated AED 453 billion in real estate investment value during 2025, increasing from AED 327 billion in 2024. Female investors contributed AED 153 billion, up from AED 118 billion a year earlier. Investment value increased across both gender groups, with male investors continuing to account for the majority of transaction value.

Total investment value reached AED 606 billion in 2025, compared with AED 444 billion in 2024. Female investor transaction value increased 30.1% year-on-year, indicating a faster pace of capital deployment among female investors during the year.

Investment Value by Gender

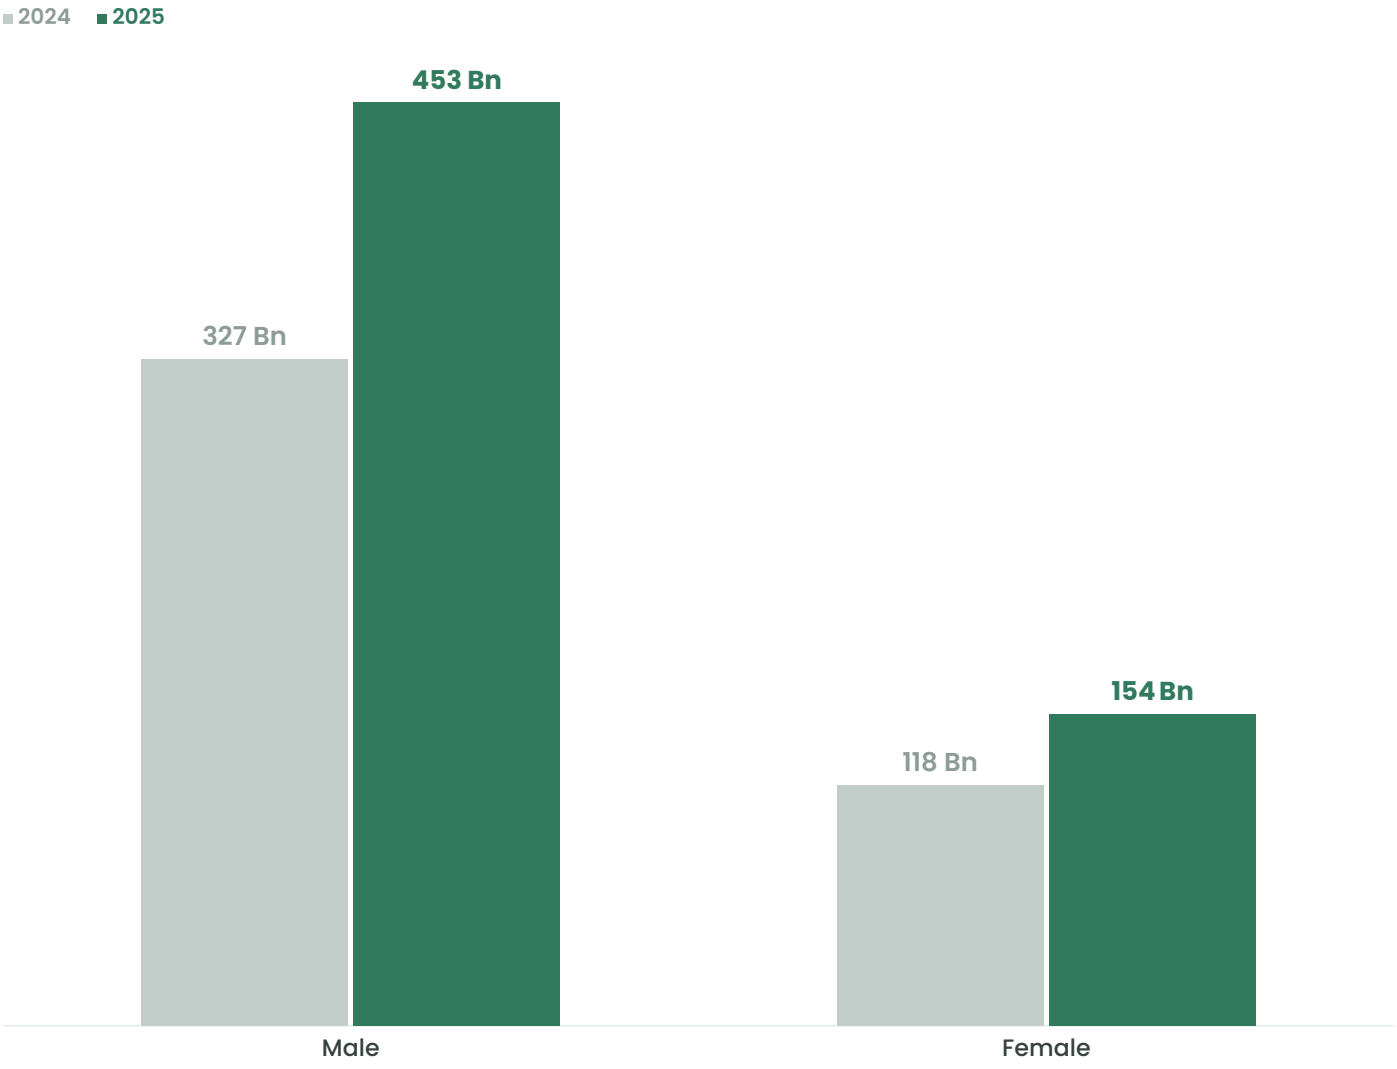

Fig 5.9: Investment Value by Gender (2024 vs 2025)

Note: The total investment value of AED 606 billion reflects investments by individual investors only and excludes institutional investors.

Female Investor Activity Reached 76K Investments and AED 153 Bn in 2025

Female investors accounted for 30.5% of total investment activity in 2025, up from 29.9% in 2024, while the male share declined from 70.1% to 69.4%. The number of female investors increased to 63,577 in 2025 from 50,467 in 2024, compared with 125,761 male investors in 2025.

Average ticket sizes increased across both investor groups between 2024 and 2025. Male investors recorded an average ticket size of AED 2.61 million in 2025, up from AED 2.25 million in 2024, while the average ticket size among female investors increased from AED 1.90 million in 2024 to AED 2.01 million in 2025. Male investors continued to record higher average transaction values than female investors.

Average Luxury Sales Prices Reached AED 41,739 per sq.m for Units and AED 31,708 per sq.m for Villas

Average luxury sales prices increased across both residential segments in 2025. Luxury residential units reached AED 41,739 per sq.m, up 6% year-on-year, while luxury residential villas reached AED 31,708 per sq.m, up 22% year-on-year.

Over the 2021–2025 period, average luxury unit prices increased from AED 34,771 per sq.m to AED 41,739 per sq.m, while average luxury villa prices rose from AED 17,359 per sq.m to AED 31,708 per sq.m. As these figures are based on recorded transactions, annual movements reflect the composition of luxury activity in each year, including the communities, projects and unit profiles represented in the market.

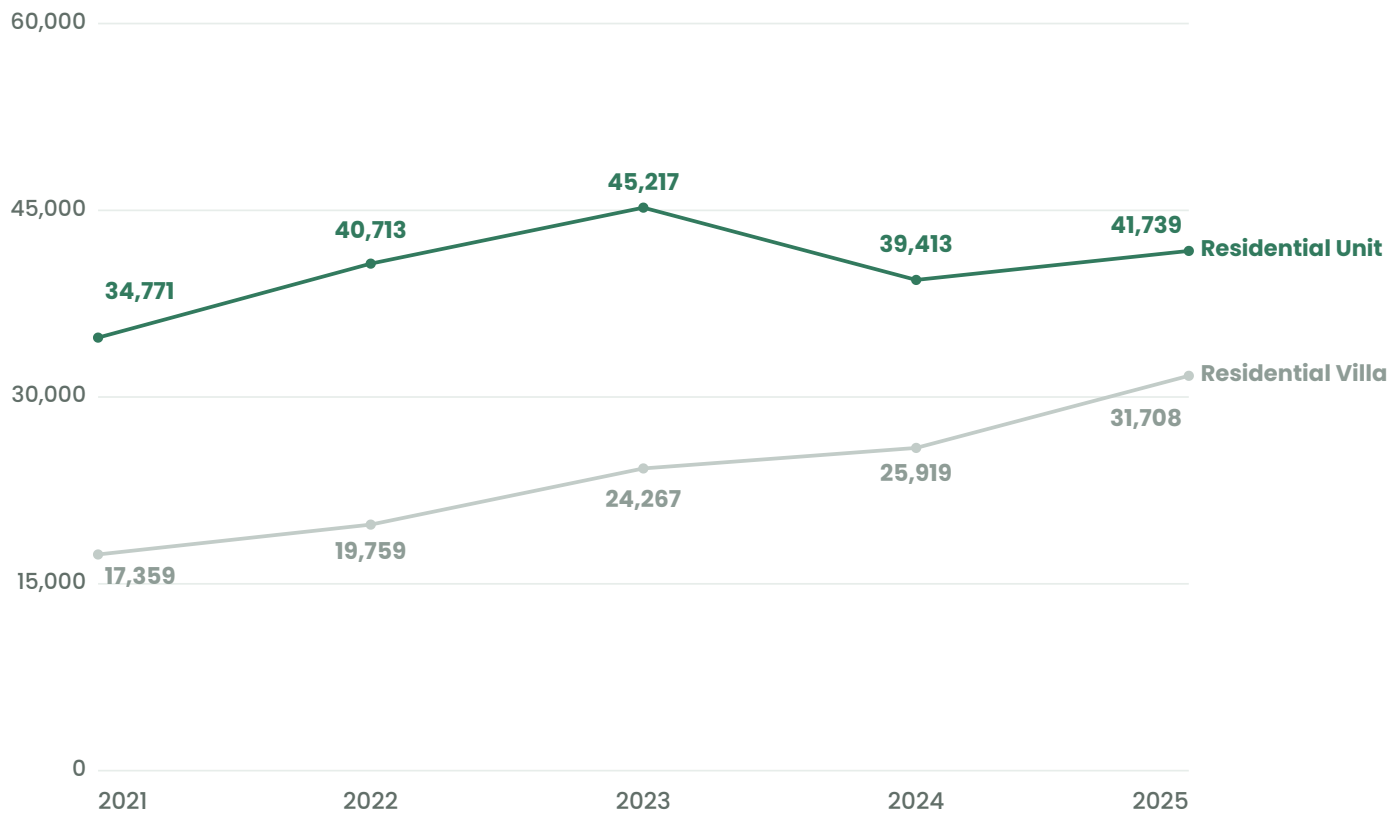

Fig 6.1: Average Luxury Residential Sales Prices, Units vs Villas (2021–2025)

Marsa Dubai and Madinat Dubai Almelaheyah Accounted for 7,579 Luxury Unit Investments

Marsa Dubai recorded the highest luxury unit investment activity in 2025, with 3,906 investments, followed by Madinat Dubai Almelaheyah with 3,673 investments. Together, the two communities accounted for 7,579 luxury unit investments among the top 10 communities shown.

Burj Khalifa and Business Bay followed with 2,423 and 2,296 investments respectively, while Al Wasl completed the top five with 1,626 investments. The ranking highlights the leading communities by luxury unit investment count in 2025.

Top 10 Luxury Unit Communities by Number of Investments

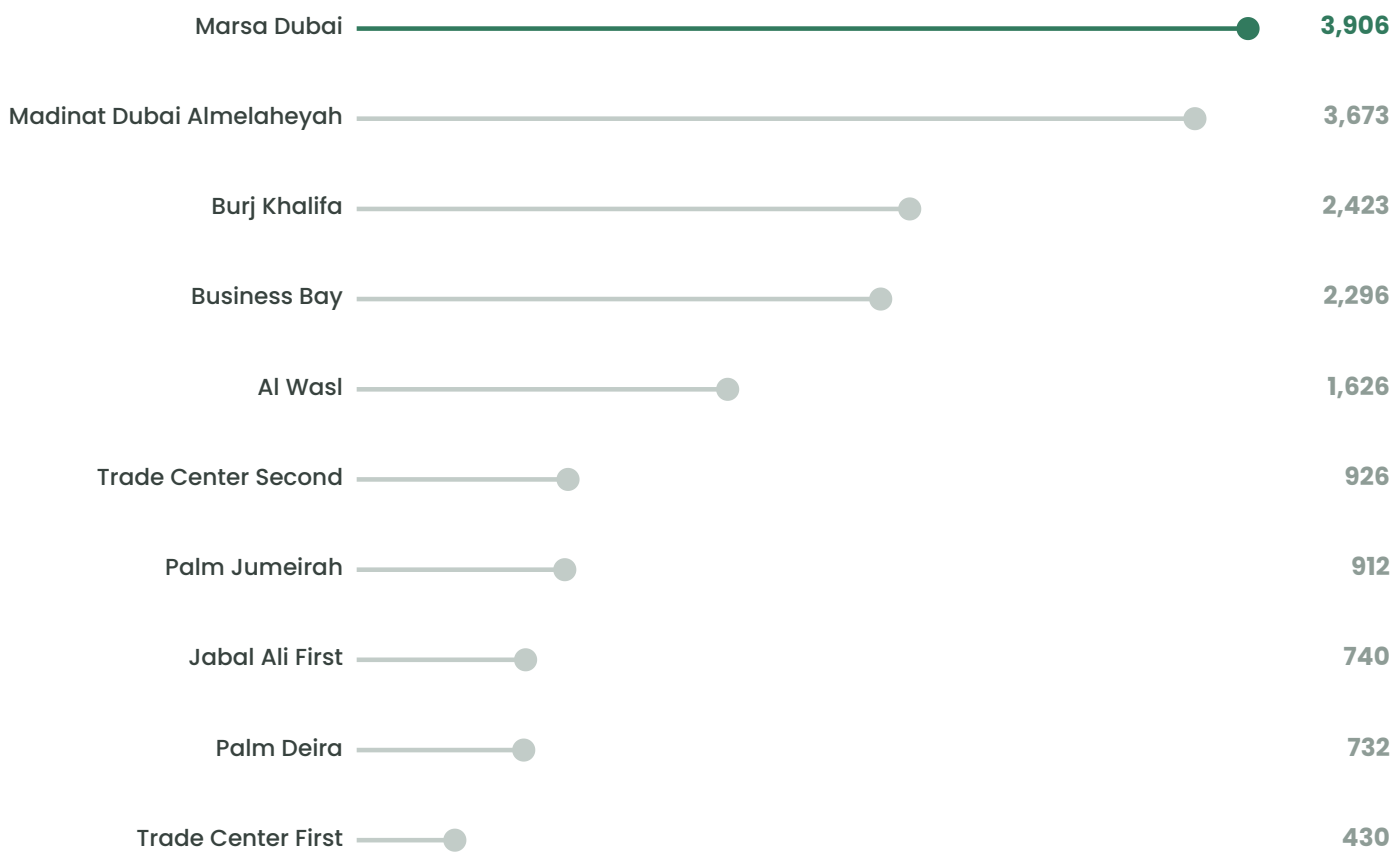

Fig 6.2: Leading Communities by Luxury Unit Investment, 2025

Jumeirah Bay Island Led Luxury Unit Pricing at AED 121,336 per sq m

Jumeirah Bay Island recorded the highest average luxury unit sales price in 2025 at AED 121,336 per sq m, followed by Jumeirah Second at AED 78,494 per sq m and Ras Al Khor Industrial First at AED 61,594 per sq m.

Pricing leadership was concentrated in select, lower activity luxury locations, while investment scale was led by larger transaction markets such as Marsa Dubai which recorded the highest investment count among the listed communities, with 3,906 investments and AED 18.2 billion in value, despite a lower average sales price of AED 46,122 per sq m. Palm Jumeirah and Trade Center Second also combined higher activity levels with average sales prices above AED 53,000 per sq m.

Wadi Al Safa 3 and DIP Second Led Luxury Villa Investment Activity

Luxury villa investment activity was led by Wadi Al Safa 3, which recorded 371 investments in 2025, followed by DIP Second with 336 and Nad Al Shiba First with 299. Together, the top three communities accounted for 1,006 investments among the top 10 communities shown.

Hadaeq Sheikh MBR and Al Hebiah Fourth completed the top five, with 234 and 213 investments respectively. The ranking shows that luxury villa activity was led by large villa-led residential districts, with investment volumes distributed across multiple communities rather than concentrated in a single location.

Top 10 Luxury Villa Communities by Number of Investments

Dubai Leasing Registrations Reached 1.04M in 2025

Leasing contract registrations reached 1.04 million in 2025, moving above the one-million level. New contracts stood at 515K and renewal contracts at 522K, resulting in an almost balanced split between new and renewal leasing activity.

From 2021 to 2025, total registrations increased from 653K to 1.04 million. Renewal contracts recorded the stronger increase over the period, rising from 295K to 522K, while new contracts increased from 358K to 515K.

Annual Contract Registrations by Contract Type

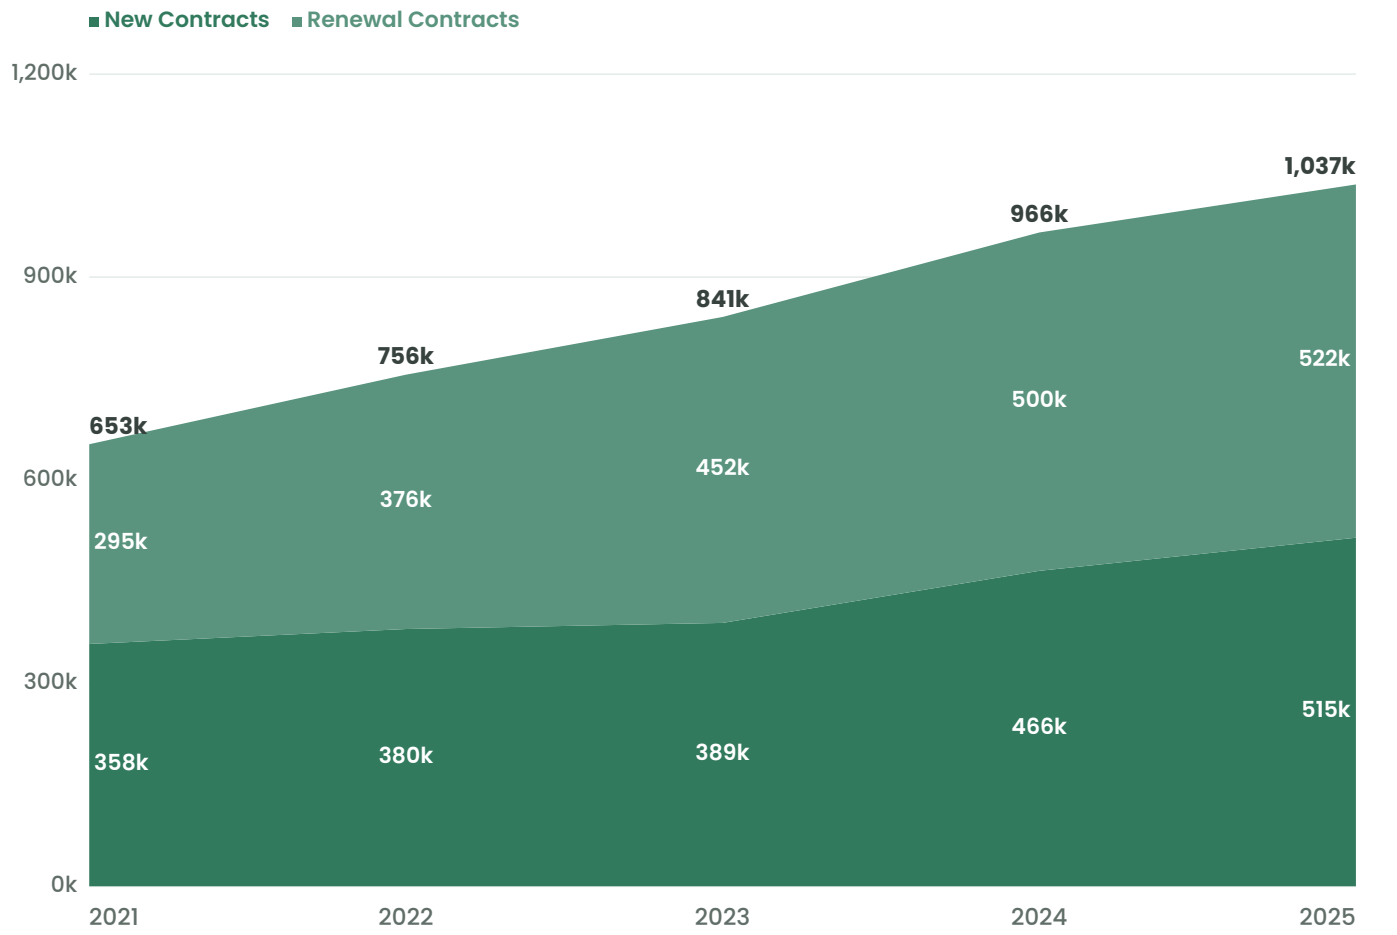

Fig 7.1: Leasing Contract Volume, New vs Renewal (2021–2025)

Annual Rent Value Increased to AED 99 Bn in 2025; New Contracts Rose by 21.1%

Annual rent values increased across both new and renewal contracts in 2025. New contract rent value rose to AED 47.3 billion from AED 39.0 billion in 2024, while renewal contract rent value increased to AED 51.7 billion from AED 46.9 billion. Total annual rent value reached AED 98.9 billion, compared with AED 86.0 billion in 2024.

Renewal contracts continued to generate a slightly larger share of annual rent value, reaching AED 51.7 billion compared with AED 47.3 billion for new contracts.

Total Annual Rent by Contract Type (AED Bn)

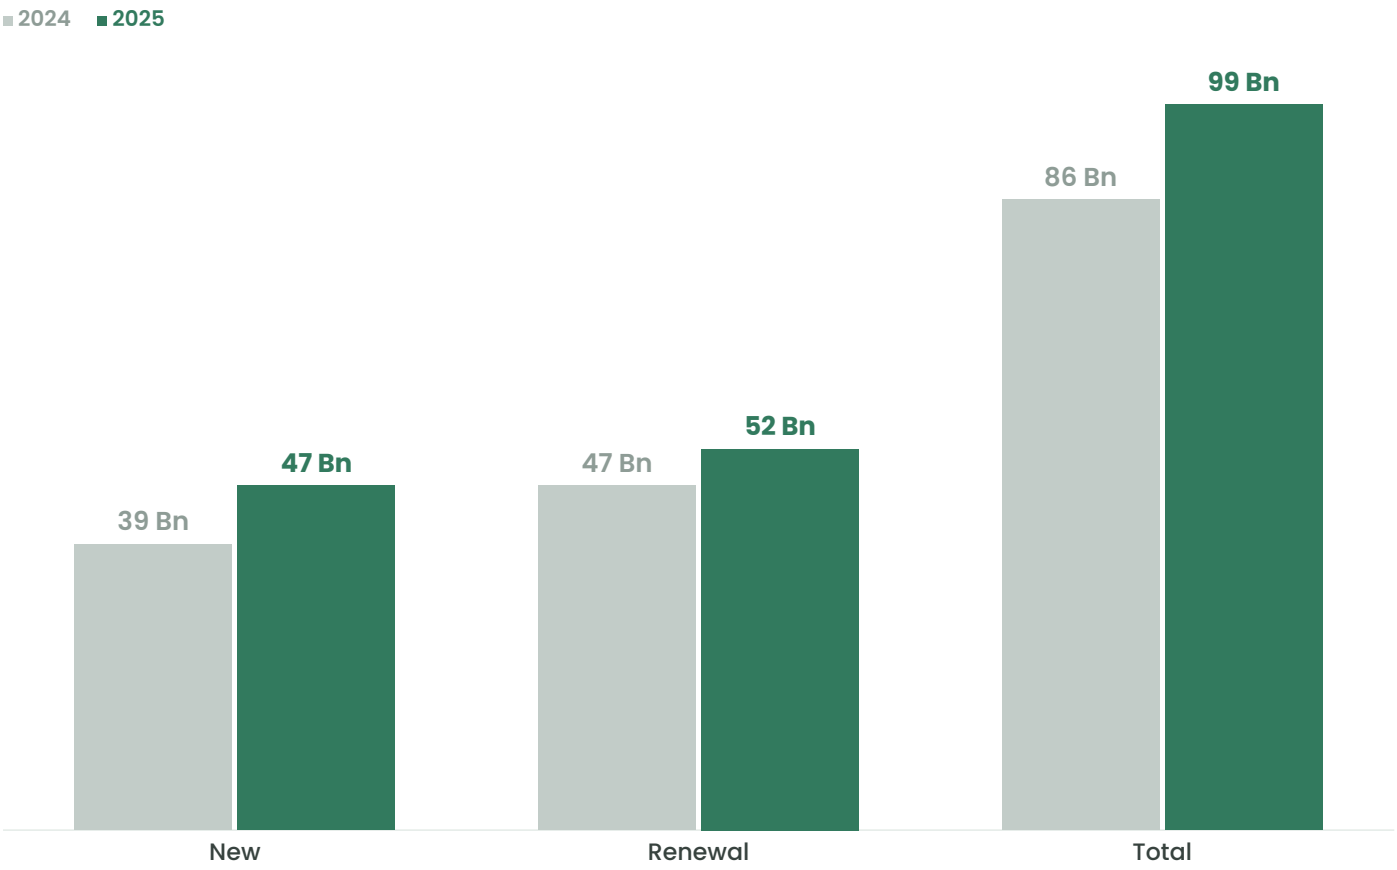

Fig 7.2: Annual Rent Value by Contract Type (2024 vs 2025)

Total Contract Value Reached AED 127 Bn in 2025; New Contracts Generated AED 69 Bn

Total contract value increased to AED 127.4 billion in 2025, up from AED 108.3 billion in 2024. New contracts accounted for AED 69.1 billion, representing 54.2% of total contract value, while renewal contracts contributed AED 58.3 billion.

Both contract types recorded year-on-year growth. New contract value increased from AED 56.1 billion to AED 69.1 billion, while renewal contract value rose from AED 52.3 billion to AED 58.3 billion. The higher contribution from new contracts indicates that newly registered leases remained the larger driver of total contract value in 2025.

DATA SOURCES AND ANALYTICAL FRAMEWORK

This report was prepared based on official data provided by the Dubai Land Department, as the primary source of data, in collaboration with REIDIN in the preparation and analysis of data and information related to Dubai's real estate market. The framework covers registered activity across transactions, sales, mortgages, gifts, property types, property categories, investor participation, pricing, rental activity, luxury market performance and location-level trends.

DATA COVERAGE

The report focuses on 2025 market activity, with prior-year indicators used where year-on-year comparison is available. Coverage includes KPIs, annual transactions, transaction groups, property type transactions, property category transactions, rental contracts, rental values, investor indicators, pricing indicators and luxury market datasets.

Together, these indicators provide the basis for assessing market depth, residential sales activity, mortgage-backed transactions, land activity, off-plan and existing property performance, investor participation, rental market conditions and pricing trends. Location-based analysis is prepared using the area and location fields available in the underlying records.

MEASUREMENT FRAMEWORK

TRANSACTION MEASUREMENT

Transaction measures are based on registered real estate records sourced through DLD. Transaction volume refers to the number of recorded transactions, while transaction value refers to the registered AED value attached to those transactions.

Transaction groups include sales, mortgages and gifts. These categories are analysed separately to distinguish ownership transfers, financing-linked registrations and non-standard ownership transfers.

PROPERTY CLASSIFICATION

Property analysis is structured using the available property type and property category fields, including units, villas, buildings, land, off-plan properties and existing properties. These categories are aggregated consistently across the report to support comparison across asset types and reporting periods.

PRICING AND RENTAL INDICATORS

Pricing indicators are presented on a price per sq.m basis. Separate pricing series are used for residential units and villas, overall units and villas, commercial units and villas, and luxury properties. Residential price analysis is based primarily on the residential unit and villa price per sq.m series. Other pricing series are used where the analysis refers to overall market, commercial market or luxury market performance.

Rental indicators are based on registered contract counts, annual rent amount and contract rent amount. These measures are used to assess leasing activity, rental value trends and location-level rental performance.

INVESTOR INDICATORS

Investor analysis is structured by area, gender, nationality region, nationality continent, residency status, registration type and new or repeat participation. The report distinguishes between investment value, number of investments and number of investors according to the available source fields.

New and repeat investor indicators are used to assess market entry, repeat participation and the depth of investor activity. Resident and non-resident categories are used to compare participation across investor groups.

LUXURY MARKET INDICATORS

Luxury market indicators are used to assess performance within the upper tier of Dubai's real estate market. The analysis covers luxury price, luxury rent and luxury investment indicators, with units and villas reviewed separately to reflect differences in asset type, pricing structure, investment value and location concentration.

KEY TERMS

TRANSACTION AND PROPERTY TERMS

TERMS	DEFINITION
Sales Transaction	A recorded transfer of property ownership between a buyer and seller.
Mortgage Transaction	A property registration linked to a financing arrangement or collateral record.
Gift Transaction	A transfer of property ownership without a standard market sale consideration.
Transaction Volume	The number of recorded property transactions within a specified reporting period.
Transaction Value	The aggregate AED value attached to recorded property transactions during a specified reporting period.
Off-Plan Property	A property transacted before completion or final handover.
Existing or Ready Property	A completed property available for legal transfer or occupancy at the point of transaction.
Vacant Land	Vacant land used as a property category in the report.
Unit	A residential or commercial unit within a multi-unit building.
Villa	A standalone property type situated on an individual plot of land.
Commercial Unit	A unit used for commercial purposes.
Commercial Villa	A villa used for commercial purposes.

INVESTOR TERMS

TERMS	DEFINITION
Investor	An individual or entity participating in a property acquisition or investment transaction.
Investment	A recorded property acquisition or investment participation.
Investor Participation	The number of investors or investor records actively participating in the market during a specified period, based on the relevant source field.
Investment Value	The aggregate AED value of transactions completed by investors during a specified period.
New Investors	Investors entering the market as new participants during the reporting period.
Repeat Investors	Investors with prior recorded market participation.
Resident Investor	An investor identified as resident.
Non-Resident Investor	An investor identified as non-resident.
Average Ticket Size	The average AED value per individual investment transaction.
Investor Origin	The geographic region or country grouping associated with investor origin in the source records.

KEY TERMS

LUXURY AND LOCATION TERMS

TERMS	DEFINITION
Luxury Unit	A residential unit within the luxury segment, based on the top 10% of unit transactions by price per sq.m.
Luxury Villa	A residential villa within the luxury segment, based on the top 10% of villa transactions by price per sq.m.
Community	A reported area, district or residential location used for market aggregation and comparison.

RENTAL TERMS

TERMS	DEFINITION
Annual Rent Value	Total annualized rental income derived from active registered lease contracts within a calendar year.
Contract Rent Value	Full contractual value of registered lease agreements over their contract duration.
New Contract	A lease agreement registered for the first time for a given property or tenant.
Renewal Contract	An existing lease agreement extended for a further term between the same landlord and tenant.
Average Daily Rate	The average rental income earned per occupied hotel room per night.
